

*Community and Voluntary Contributions*

### Natural Capital

#### (NC)1 Vision:

**“We will have species, habitats and water bodies that are resilient to the impacts of climate change”**

### Natural Capital

#### (NC) 2 Vision:

**“We have coastal communities, habitats, landforms and infrastructure that are resilient to the impacts of climate change”**

## Shifting Shores – Playing our Part on the Coast

National Trust

### NI Evidence Report Risks & Opportunities Addressed:

**Ne11:** Risks to aquifers, agriculture land & habitats from salt water intrusion

**Ne14:** Risks & opportunities from changes in landscape character

**Ne12:** Risks to habitats & heritage in the coastal zone from sea-level rise: & loss of natural flood protection

**Pb6:** Risks to the viability of coastal communities from sea level rise

### Collaborating Organisations:

Coastal Local Authorities in NI, Ulster University, and local community representatives

### Funders

National Trust and other funders as appropriate

### Implementation Timeline

Ongoing

### Strategic Project

Promote partnership working and develop coherent strategies to deal with risks to NI's coastal aquifers, habitats and landscape character from salt water intrusion caused by increasing sea level rise and increasing tidal surges.
